PROFESSIONAL SUMMARY

Fullstack Developer & UI/UX Designer with a Bachelor's in Software Engineering and a record of shipping user-centered products from wireframe to production. Bridges design and engineering by combining expertise in design systems, interaction design, and Figma workflows with fullstack development across frontend, backend, and databases. Experienced across the product lifecycle — from user research and prototyping to deployment and maintenance.

EDUCATION

Bachelor of Software Engineering

Nov 2021 – June 2025

University of Engineering and Technology (UET) Taxila

Taxila, Pakistan

SKILLS

UI/UX Design	Wireframing, Prototyping, Interaction Design, User Flows, Usability Testing
Design Tools	Figma, Adobe XD, Illustrator, Photoshop, After Effects, Premiere Pro
Figma Advanced	Auto Layout, Components, Variables, Dev Mode, Prototyping, Design Handoff
UX Methods	User Research, Personas, Empathy Mapping, Journey Mapping, A/B Testing
Design Systems	Component Libraries, Token-based Design, Visual Hierarchy, Mobile-first Design
Frontend	React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
Databases	MySQL, Oracle DB, Firebase, MongoDB, MariaDB
Dev Tools	Git, GitHub
Soft Skills	Cross-functional Collaboration, Agile/Scrum, Client Communication

EXPERIENCE

UI/UX Designer

Aug 2025 – Present

Hexler Tech

Islamabad, Pakistan

- Eliminated recurring design-dev miscommunication by building a scalable, Figma component library and design system, cutting client revision cycles by 40% and significantly accelerating overall product delivery timelines.
- Drove measurable gains in product adoption by delivering pixel-accurate, responsive, cross-browser compatible, accessible interfaces that reduced post-launch UX issues and strengthened client retention across all engagements.

UI/UX Engineer Intern

Jun 2024 – Aug 2024

Inara Technologies

Islamabad, Pakistan

- Accelerated developer handoff by delivering production-ready wireframes and high-fidelity, developer-ready, focused prototypes across multiple sprints, eliminating design ambiguity and reducing engineering rework.
- Uncovered critical friction points in the SaaS dashboard through user flow analysis and heuristic-based usability reviews, directly informing data-driven design iterations that significantly improved task completion clarity.

PROJECTS

Cricket Broadcasting Platform — UI Design + Frontend Development

Feb 2025 – July 2025

React.js · Tailwind CSS · JavaScript

- Solved the lack of a centralized broadcast experience by engineering live match dashboards and real-time score widgets, giving fans a single destination that drove measurable gains in session duration and content engagement.
- Eliminated cross-device inconsistency by building a fully responsive React.js frontend with a strict component hierarchy, ensuring a seamless viewing experience across mobile, tablet, and desktop without layout regression.

Finance Management Portal — UI Design + Full-Stack Implementation

Oct 2024 – Dec 2024

React.js · Tailwind CSS · JavaScript · MySQL

- Addressed the absence of an affordable personal finance tool by delivering a data-dense dashboard with expense tracking and budget visualization, giving users actionable financial clarity without overwhelming cognitive load.
- Solved the problem of raw data being unreadable by implementing a MySQL-backed layer with real-time chart rendering, converting complex records into digestible visual summaries that drove consistent daily engagement.

Parking Management System — Full-Stack Application

Jun 2024 – Aug 2024

React.js · Tailwind CSS · JavaScript · Oracle DB

- Eliminated manual space tracking inefficiencies by engineering a real-time occupancy dashboard, enabling facility operators to allocate slots instantly and reducing mismanagement errors that previously caused revenue loss.
- Solved multi-user access conflicts by architecting a role-based system with separate Admin and End User views, ensuring each stakeholder only interacted with workflows relevant to their operational responsibilities.

Fatwrap — Brand Identity & UI/UX Design

Food Product

Figma · Adobe Illustrator · Photoshop

- Solved the brand’s lack of a cohesive digital identity by delivering end-to-end UI/UX design, from user journey maps to prototypes, creating a seamless customer experience from menu browsing to order confirmation.
- Increased conversion potential by designing a mobile-first interface with appetite-driven visual hierarchy and strategically placed CTAs, aligning every design directly and measurably with the client’s revenue objectives.

Sugarloop — Brand Identity & UI/UX Design

F&B / Bakery Brand

Figma · Adobe Photoshop

- Solved the brand’s need for a distinct market identity by crafting user personas, empathy maps, and interaction flows that translated Sugarloop’s indulgent doughnut experience into a crave-worthy digital presence.
- Drove purchase intent by designing a high-fidelity mobile interface with a visually rich product showcase, streamlined ordering flow, and strategically placed CTAs that significantly reduced steps from discovery to checkout.
